

CZ 2075 RAMI

THE CZ 2075 RAMI SUBCOMPACT OFFERS ALL THE MAIN BENEFITS OF THE CZ 75 PISTOLS – HIGH POWER, OUTSTANDING ACCURACY AND SUPERIOR ERGONOMICS IN COMBINATION WITH EXCEPTIONALLY SMALL DIMENSIONS.

THE CZ 2075 RAMI WAS BORN AT THE BEGINNING OF THE NEW MILLENNIUM WITH THE INTENTION TO OFFER CZ 75 FANS A BACK-UP OR VERY SMALL DEFENCE HANDGUN. THIS 75 BABY WITH A 3-INCH BARREL AND DURABLE ALUMINIUM ALLOY FRAME HAS THE SAME TRIGGER AND FIRING MECHANISM AS ITS BIGGER SISTERS, BUT CONTRARY TO THEM, IT USES A MORE MODERN BLOCK AROUND THE BARREL'S CHAMBER AREA THAT LOCKS INTO THE EJECTION PORT. DESPITE ITS MINIMAL SIZE, THE RAMI IS HIGHLY ACCURATE AND EXCEPTIONALLY COMFORTABLE TO HOLD, WHICH CAN BE FURTHER IMPROVED BY USING A SPECIALLY SHAPED ATTACHMENT WHEN USING HIGHER CAPACITY MAGAZINES.

Compact shape suitable for concealed carry

Flat controls designed for concealed carry

Helical recoil spring
